FIYINFOLUWA OSIFALA

Software Engineering — New Graduate, May 2027
Hammond, LA | 860-368-7959 | Osifalafiyin@gmail.com | linkedin.com/in/fiyinfoluwa-osifala | github.com/Fiyinosif

EDUCATION

Southeastern Louisiana University | *Hammond, LA* **Aug 2023 – May 2027**

- B.S. Computer Science, Data Science concentration — Honors Program | **GPA: 3.84**
- **Honors:** President's List, six consecutive semesters (Fall 2023 – Spring 2026); Sophomore Honors Distinction; merit-based Non-Resident Fee Waiver
- **Relevant coursework:** Data Structures, Algorithm Design and Implementation I & II (Honors), Software Engineering, Database Systems, Artificial Intelligence, Survey of Programming Languages

TECHNICAL SKILLS

Languages: Python, TypeScript, C#, JavaScript, SQL (T-SQL), HTML, CSS

Backend & Web: ASP.NET Core, FastAPI, Node.js and Express, React, Vite, REST API design (Swagger), request validation and rate limiting

Tools & Data: Git, GitHub, SQL Server, Google Apps Script, language model APIs (Gemini, OpenRouter)

PROJECTS

Trace: Evidence-Aware Phishing Assessment | *FastAPI backend — github.com/Fiyinosif/trace-agentic-rag* **Sep 2026 – Present**

- Built a FastAPI backend using hybrid retrieval (BM25 + Sentence Transformers), reciprocal rank fusion, and cross-encoder reranking, which assesses suspicious emails and SMS and verifies each claim against retrieved evidence
- Built a controlled evaluation on 200 messages, which showed claim-level verification raised accuracy from 69.04% to 70.56% and F1 from 94.18% to 95.79%

Agora: Thread-Based Discussion Platform | *Team of four — React, TypeScript, Mantine UI; C# / ASP.NET Core; SQL Server* **CMPS 285 — Team Lead**

- Led a team of four building Agora for the CMPS 285 course instructor, using React / TypeScript / Mantine UI with a C# / ASP.NET Core REST API documented in Swagger — github.com/Fiyinosif/Agora-Discussion-Platform
- Built the threaded discussion model using a self-referencing SQL Server schema (nullable ParentId, 10 tables), which stores head topics and nested replies in one table
- Built role-based moderation using owner / admin / member permissions, which supports temporary and permanent bans, member invites, user follows, reactions, and tag filtering with a trending sidebar

Synapp: Interactive Body Explorer | *Team of four — React, TypeScript, Three.js; Swift / Vapor backend* **Oct 2026**

- Built backend integration using Swift / Vapor with a React / TypeScript / Three.js frontend, which lets users pick 1 of 11 regions on a 3D body, describe symptoms, and get source-backed guidance from a companion grounded in curated library content
- Built the 8-question red-flag screening plus request validation and rate limiting, which routes users to 4 safe outcomes, never diagnoses, and keeps the app working without the AI; demoed the working MVP to Professor Kuo-Pao Yang and a class of 22 in Survey of Programming Languages

ACE: AI-Powered Study Planner | *Team of three, LionHacks hackathon — React, Node.js, Express, Google Gemini* **Apr 2026**

- Built the survey scoring service, plan builder, and survey route using React, Node.js / Express, and Google Gemini 1.5 Flash, which parses uploaded syllabi (PDF/TXT) and generates a personalised 7-day (Monday–Sunday) study plan with resources and a progress dashboard
- Built fallback logic into the plan builder, which returns a complete plan even when the AI service is rate-limited; demoed the working prototype to 16+ teams and 6 judges at LionHacks

LEADERSHIP & EXPERIENCE

Resident Manager | *University Housing, Southeastern Louisiana University* **Jan 2025 – Present**

- Supervise and mentor 23 Resident Assistants in a fast-paced, high-accountability residential community
- Automated 1-on-1 scheduling between RAs and the Area Coordinator using Google Calendar and Apps Script, auto-generating recurring check-in slots and reminders and replacing manual coordination

Resident Assistant | *University Housing, Southeastern Louisiana University* **Jan 2024 – Dec 2024**

- Supported a community of 50+ residents as first point of contact; mediated conflicts and facilitated 11+ roommate agreements; coordinated building readiness and resident communication during flood warnings
